01 About

I am a Business Operations & Revenue Coordinator based in Lusaka, Zambia, currently leading group-level operations at ProWeb Limited. My work sits at the intersection of process design, CRM optimisation, and cross-functional project delivery — making complex systems run cleanly.

I hold a BBA (Cum Laude, 3.54 GPA) from University of the People — a WSCUC-accredited institution — and am certified in HubSpot Revenue Operations and HubSpot Sales Hub Software. My project credentials span Zambia's most prominent financial and regulatory institutions, including the Bank of Zambia, the Securities and Exchange Commission, and the Lusaka Securities Exchange.

I am passionate about building operational infrastructure that scales, and I bring the same rigour to client-facing coordination as to internal SOP development.
